

Phoenix Christian Jr/Sr High School Technology Department Philosophy Statement

Computer technology has become an irreplaceable, ubiquitous tool critical to all walks of life. Therefore, it is the goal of the Technology Department here at Phoenix Christian to provide students the curriculum necessary for success in this technical world, but from a Christian worldview. We believe a Christian worldview influences not just what or how we teach, but the very manner in which those skills are applied later in life. Toward this end we teach how to use a computer successfully through the appropriation of technical skills; however we also teach how to use those skills, not just with integrity or ethics, but also by taking every thought captive and making them obedient to Jesus Christ our Lord.
